

Pacific Islands

These islands formed by fire from the sea,
Volcanoes that have grown each century,
Became a part of a discovery
By Polynesians who reportedly
Were sailing for a different destiny,
But landed in this place of true beauty.

For many years there was a monarchy,
The last one was Liliuokalani,
Who was thrown out in 1893.

The many Protestant missionary
Groups sailed for months across the open sea
To help Hawaiians with true courtesy,
Converting them to Christianity.

These island people have a purity
That has a rich ethnic diversity,
With mixing Asian cultures plain to see.

White beaches and great surfing are the key
To making tourists come here happily.
With hula dancing happening nightly
This last state surely is the place to be.
