

Potatoes Forever

From French Fries to Au Gratin style cooking,
Or recipes that are not fattening,
The Idaho potatoes are the king.

The farmers are adept at managing
These crops because of how much they can bring,
So even barren ground looks promising
From harvest time till planting in the spring
When migrant birds and locals start to sing.

With grace and beauty so enlightening
The peregrine falcon does its thing,
By watching from the air what's happening
From altitudes where he sees everything
Including any little opening
Where unsuspecting prey are scurrying.

"Esto Perpetua" means just one thing,
To keep their way of life from lessening
And make their happiness true and lasting
Ensuring that our world is strengthening.
By any way that's used for measuring
This state is certainly contributing.
